

VAGD 243 : BASIC TYPOGRAPHY
PROJECT NO. 2: BITMAP FONT

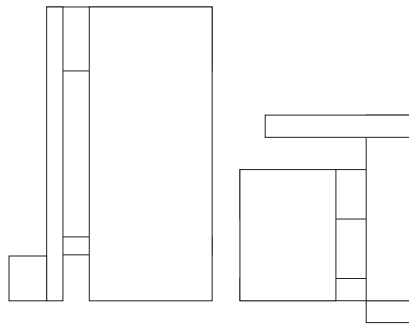

DESIGN

Create a bitmap font by designing letters based on a 9 x 9 grid of squares. Use only square, geometric shapes to design your letters. No traditional curves or diagonal lines are allowed—and avoid excessive stair-stepping.

You will design the letters of the word **hamburgfont**. You may design either an uppercase or lowercase version of your font. Begin with sketches on graph paper and then digitize your design.

PRESENT

- Digitize your font using the Font Struct online tool (fontstruct.fontshop.com).
- Present your font sample in four cascading sizes on an 8 1/2 x 11 sheet.
- Include your name as well as the name of your font.
- Remember to *design* your presentation.

POSSIBLE POINTS: 30
